How to use it

It will give you a pop up box, under the inputs tab, you can further optimize the indicator by changing the value for the option “steady” to true.

You can change your bar colors to any color tone you like, to match the other color indicators that you are using.

When you see a blue bar, enter/buy the currency pair and when you see the red bar, exit/sell the currency pair. You should probably start off with a smaller lot size, such as .1 or .05.

See image below for example:
